CARICO'S REGENERATION

CARICO'S ADVANCED OXIDATION PROCESS OFFERS CUSTOMERS A NEW, ENVIRONMENTALLY-FRIENDLY WAY TO REGENERATE THEIR WHOLEHOUSE TANKS.

NO NEED TO REBED YOUR WHOLEHOUSE TANK FOR 20 YEARS

Carico's Regeneration is a proprietary, non-toxic, green chemical that restores your tank to like new condition without replacing the media. Carico's Regeneration uses a patented process that rapidly produces hydrogen free radicals that seek and destroy all contaminants including PFAs, PFOs and all other "forever chemicals" that were removed by your Carico Wholehouse Filter.

Adding Carico's Regeneration to your Wholehouse Filter restores it to >99% of its original capacity. The process takes only 1 hour, with no toxic discharge and no residual.

ENVIRONMENTAL ADVANTAGES:

- **NO** storage/disposal problems
- **NO** release of adsorbed pollutants
- **NO** nuisance or biological growth
- **LIFE SPAN OF 5-7 YEARS** from an initial concentration of as low as 0.5 ppb in only 4 to 5 minutes

REGENERATION INVOLVES JUST A FEW STEPS:

- 1 - Backwash**
- 2 - Insert Carico's Regeneration**
- 3 - Let stand for at least 1 hour**
- 4 - Rinse**

YOU CAN REGENERATE YOUR TANK AS OFTEN AS YOU LIKE!
